

IBM Business Partner Innovation Centre

Your business IT in safe hands

Tardis Services is one of Australia's leading IT providers, offering an end-to-end service for the design, implementation and support of enterprise information systems.

Established in 1994, and now part of the worldwide Meridian Group of companies, we stand out by taking a business-centric approach to IT infrastructure, working with the world's leading technology brands to design best-of-breed solutions to your business information challenges.

Partnering with Tardis to build and manage your information infrastructure means you have a single point of contact, and a single trusted partner, committed to achieving your business objectives.

We are a leading provider of IBM Intel and UNIX Servers, Storage and Infrastructure Solutions specialising in corporate, SME and Government markets.

Tardis offers a single point of contact for your IT needs, from concept through to implementation and on into the future, with systems support, maintenance and upgrades.

Australia's First IBM Business Partner Innovation Centre

Acknowledged as the IBM Business Partner of the Year 2006, Tardis is one of Australia's most successful IBM Business Partners. As a mark of our commitment to delivering exceptional IT solutions to our partners, we have opened Australia's first IBM Business Partner Innovation Centre (BPIC).

The IBM BPIC is a leading-edge facility to showcase the Tardis offering of IBM hardware and software solutions. The IBM BPIC presents an innovative opportunity to allow our partners to gain unprecedented access to new IBM technologies and market initiatives. This gives you the opportunity to maintain your company's edge in an increasingly competitive market.

An Innovative Approach to IT Consulting

The IBM BPIC has been designed to provide a consultative approach to delivering the best IT solutions for your business information challenges. The IBM BPIC is a dedicated customer environment staffed by Tardis's IBM certified representatives, whose technical acumen deliver an exceptional standard of consulting on services such as complex storage and server solutions for your business.

A Collaborative End-to-End Solution

Tardis have been providing end-to-end hardware and software solutions, covering the full spectrum of business infrastructure and software possibilities for almost fifteen years. The addition of the IBM BPIC enables us to enhance our end-to-end service offering, with dedicated, personalised service.

The IBM BPIC allows us to offer you an experiential environment for product test drives and demonstrations, proof of concept, solution architecture design consultations, customised workshops and training for you and your team, and outstanding after-sales support.

IBM BPIC Technological Capabilities

Tardis's awarded reputation the premier IBM Business Partner is reflected in our incomparable single point of contact approach to the conceptualisation, design, implementation, and support of our business information solutions.

Extending our single-point approach further, we now offer these best-of-breed technologies under one roof at the IBM BPIC. The specific technologies showcased at the IBM BPIC include: POWER Systems, System x, storage, POS, TPC, SVC and VMware.

Hardware

- POWER Systems — including virtualisation
- Storage — Virtualisation (SVC), Midrange Disk (DS4000) and Nseries
