

Infrastructure

Your business IT in safe hands

Tardis Services is one of Australia's leading IT providers, offering an end-to-end service for the design, implementation and support of enterprise information systems.

Established in 1994, and now part of the worldwide Meridian Group of companies, we stand out by taking a business-centric approach to IT infrastructure, working with the world's leading technology brands to design best-of-breed solutions to your business information challenges.

Partnering with TARDIS to build and manage your information infrastructure means you have a single point of contact, and a single trusted partner, committed to achieving your business objectives.

We are a leading provider of IBM Intel and UNIX Servers, Storage and Infrastructure Solutions specialising in corporate, SME and Government markets.

Tardis offers a single point of contact for your IT needs, from concept through to implementation and on into the future, with systems support, maintenance and upgrades.

IBM Systems and Storage

Australia's leading IBM infrastructure reseller, with a number of National and Regional IBM Partner awards to our name, Tardis has invested in a Business Partner Innovation Centre (BPIC) where IBM's infrastructure is on display and available for testing, demonstration and Proof of Concept. The BPIC technologies include: POWER Systems, System x, storage, POS, TPC, SVC and VMware.

Our infrastructure offerings for POWER Systems, System x, storage and POS include design of new systems and upgrades, delivery and maintenance, configuration, QA, security and environmental planning.

IBM POWER System (UNIX)

- Design, configure and implement new systems and upgrades, including features for: virtualisation (VIOS), HACMP for High Availability, HMC. Tardis is very familiar with enterprise multiple LPAR configurations
- Support on AIX versions through to V6
- Design appropriate storage solution for POWER System, from internal disk to external storage and SAN solutions

IBM POWER System (AS400)

- Design and implement new systems and upgrades, including features for virtualisation (LPARs), HA solution utilising noMAX software.
- Disaster Recovery plan creation and testing
- Capacity planning and performance monitoring
- Support on i5/OS through to beta V6
- i5/OS version and PTF upgrades
- Client connectivity advice and implementation
- Backup and recovery, including BRMS
- Web server and application server configuration

IBM System x (Wintel) and BladeCenter (Intel, AMD, POWER)

- Design and implement new systems and upgrades, including solutions for virtualisation (VMware), High Availability and Disaster Recovery.
- Design appropriate storage solution for System x and BladeCenter
- Design POWER blade solutions which now cover AIX, Linux and i5/OS
- Windows 2003, Terminal Services, Clustering, Citrix, Red Hat, Notes, Exchange, SQL

Infrastructure (cont.)

IBM Storage

- Design and implement new disk storage systems and upgrades based on best practice
- Utilisation of tools like Disk Magic to aid in the design
- Configure solutions for virtualisation incorporating SAN Volume Controller (SVC)
- Solution cover IBM's entire storage range from small DS3000 and DS4000 through to enterprise DS6000 and DS8000; also the Nseries range of network attached storage
- Configure solutions for advanced copy functions and replication
- Tardis has capability in Total Productivity Storage Centre (TPC) advanced storage management across heterogeneous storage environments
- Design and implement new tape storage system, from small single LTO4 drives (TS2230) through to enterprise tape libraries with multiple drives and frames (TS3500)

IBM Retail Solutions

Tardis is actively engaged with the IBM Retail Store Solution (RSS) offerings. Fully certified in the RSS products, Tardis designs, procures and implements RSS offerings and associated peripherals:

- SurePOS 300, 500, 700
- AnyPlace Kiosk

Tardis retains a team of experience technical consultants, fully certified in all appropriate IBM infrastructure solutions, as well as strong partnerships with major application vendors to deliver a one-stop shop to maximise your technology investments. In addition to IBM Certifications, we have the following industry certifications for non IBM technologies:

- Microsoft Gold Partner (Highest achievable level)
- VMware Enterprise Partner
- Cisco Premier Partner
- Citrix Partner
- Watchguard partner
- Red Hat Partner

Turn-key infrastructure solutions — built on innovative thinking

In a rapidly changing world, the edge belongs to the person who knows what's going to happen next.

Our reputation for meeting budgets and deadlines, and for delivering solutions that deliver results, comes down to our fundamental commitment to innovation; and central to this is the constant development of the skills and knowledge contained within our organisation.

Tell us what you want to achieve, and we'll work with you to deliver the best, most reliable and most cost-effective way to do it — from concept to implementation and into the future — enabling your business to gain maximum value from your information assets.
