

Corporate Overview

Corporate Overview

Tardis Services

Tardis Services (Tardis) is one of Australia's leading IT providers, offering an end-to-end service for the design, implementation and support of enterprise information systems.

Established in 1994, and now part of the worldwide Meridian Group of companies, we stand out by taking a business-centric approach to IT infrastructure, working with the world's leading technology brands to design best-of-breed solutions to your business information challenges.

Our client list includes some of the most respected names in Australian business, including Optus, George Weston Foods, Macquarie Bank and Fuji Xerox.

With Tardis, you work with a single point of contact for your IT needs, from concept through to implementation and on into the future, with systems support, maintenance and upgrades. And as part of the Meridian Group, Tardis has access to a wealth of IT expertise and support capabilities via operations in the USA, Canada, UK, Germany and France.

Tardis is a leading provider of IBM® Intel® and UNIX® servers, storage and infrastructure solutions specialising in corporate, SME and Government markets.

Turn-key infrastructure solutions — built on innovative thinking

In a rapidly changing world, the edge belongs to the person who knows what's going to happen next. Our reputation for meeting budgets and deadlines, and for delivering solutions that deliver results, comes down to our fundamental commitment to innovation; and central to this is the constant development of the skills and knowledge contained within our organisation.

Tell us what you want to achieve, and we'll work with you to deliver the best, most reliable and most cost-effective infrastructure solution — from concept to implementation and into the future — enabling your business to gain maximum value from your information assets.

Managed Services

Tardis Services can provide tailored, on-site technical support to provide Information Technology solutions that support your business goals. On site service and remote support are tailored to meet your business' exact needs. Because Tardis maintains a large pool of qualified and trained engineers, we can be flexible and grow with you.

Disaster Recovery

A disaster can be anything that results in inability to access the IT infrastructure, be it fire, burst water pipes, gas leaks, accidents causing serious injury, storms or damage to adjacent property. Or it could be serious corruption of a database. The result is the same — failure to operate the IT infrastructure to support the critical business processes.

Tardis Services can tailor a Disaster Recovery test procedure to fit your business needs.

End-to-end Storage Solutions

In today's fast-changing business environment, the volume of data that is available has increased dramatically. Tardis' end-to-end storage solutions are designed to help you manage the information explosion, streamline costs, improve service delivery and mitigate risks by helping you address core capabilities around information compliance, availability, retention and security.

Implementation Services

All Tardis implementations are managed by dedicated implementation managers who ensure a professional, on time — on budget delivery.

Technical Consulting

Tardis' Technical Consulting services will work closely with your technical, as well as your business management teams, to thoroughly analyse the existing challenges and opportunities in your enterprise and then to produce the right solution. The assistance is actuated through the supply of consulting teams with wide experience, both within the business and management sphere as well as the technical sphere. The overlapping technical skills and enterprise management credentials ensure that the Tardis Technical Consulting team can design and deliver a balanced solution to suit your operational and strategic requirements.

Our end-to-end Professional Services group will focus on your business goals to assist and consult with you for capacity and consolidation planning, systems changes and upgrades, voice, data or video integration, or enterprise and information security. Tardis is driven to provide 100% customer-satisfaction.

System Development and Programming

Tardis Services has a proven track record in developing quality business applications. We have been designing, developing and implementing custom solutions for our customers for over 10 years, offering comprehensive, end-to-end programming services for both the Web and Windows environments. We provide fixed price quotations for all engagements, based on quality detailed specifications. Tardis can provide qualified and experienced staff for all stages of the software development lifecycle.

The tools we deploy provide compatibility with your current IT infrastructure, enabling rapid and efficient solution development for fast time to value, and our specialists are certified in all the appropriate toolsets for leading platforms.

Combined with our business-focused project management philosophy, this means that you get the best software for the job, on time and on budget.

Certified professionals in leading platforms

Tardis has over 50 IBM technical certifications in POWER® Systems, System x®, storage, DB2®, Tivoli® and Lotus®.

We have achieved certified Sales Partner status with the major best-of-breed non-IBM vendors in a range of technology spaces, specifically:
